ALM Organic Growth Accelerator

ALM directly works on roots, leaves, cells and fruits through the low molecular organic acid components secreted from its herb-based medicines and microbes. It helps plants build immunity that also resists severe environment.

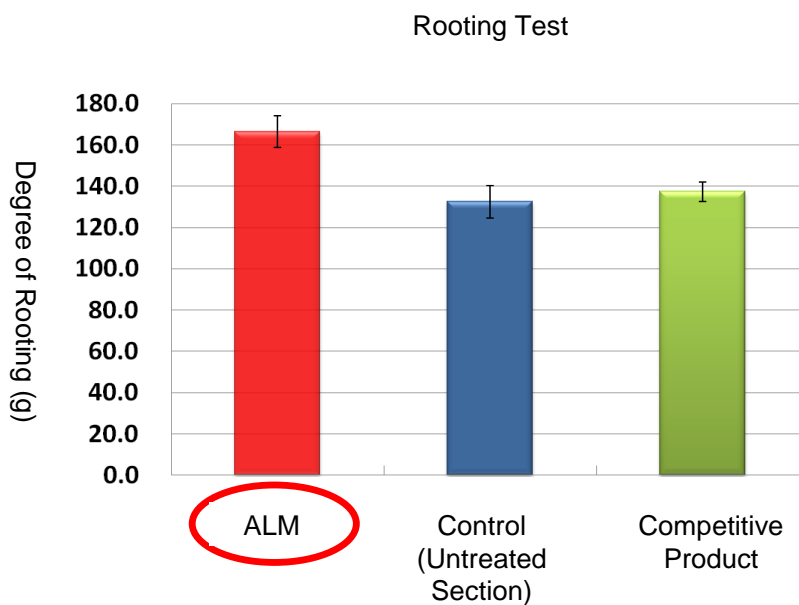

Plants have their roots fastened deep into soil to absorb nutrients required for their growth. The deep-fastened roots help them enhance immunity to resist insect pests and diseases.

The selected herbs used for ALM contain the ingredients that insect pests dislike. ALM creates insect-free environment in your farms.

ALM is safe to both environment and people because its ingredients decompose naturally in water or soil in 2~3 weeks and never be left in plants.

ALM Division is an ISO 9001-certified world class organization dedicated to develop, manufacture and sell ALM products which are in compliance with organic Japan Agricultural Standard (JAS). Its Agricultural Research Laboratory constantly develops organic agricultural products required to produce safe and healthy agricultural products. It also verifies the safety and effectiveness of ALM products with the assistance with Yamagata University and Fukuyama University.

## **ALM Organic Growth Accelerator**

Oki Corporation. ALM Division (Manufacturer & Distributor)

4-11-25, Minamimatsunaga, Fukuyama, Hiroshima 729-0105

TEL: 084-933-3188; URL: [www.almnet.co.jp](http://www.almnet.co.jp); e-mail: [webmaster@almnet.co.jp](mailto:webmaster@almnet.co.jp)

## ALM Lin (Liquid)

### Application

Raising Seedling Time: Spray a 1/2000 solution onto surfaces of leaves once every 10 days.

Rice Field: Spray a 1/1000 solution onto leaf surfaces once every 7 days.

Effects: Spray on leaves of growing plants in advance to stay away from troubles.

Apply sooner to produce better results.

Enhance plants' immunity to external injuries.

Protect plants from bugs and diseases.

## ALM Jun EX (Liquid)

### Application

Raising Seedling Time: Spray or sprinkle a 1/2000 solution onto surfaces of leaves once every 10 days.

Rice Field: Drench a 1/1000 solution around roots once every 7 days.

Spray a 1/1000 solution onto leaf surfaces once every 7 days.

Effects: Enhance good seedling constitution.

Protect the environment of the rooting zone.

Revitalize the plants exhausted from heat (Use in combination with ALM Super (granules) for the best results.)

REGISTERED ORGANIZATION

No.3691-ISO 9001
